APPENDIX 2

MULTI BOARD STATEMENT OF UNDERSTANDING

The signed professional healthcare boards recognize the need for appropriate treatment of acute and chronic pain, yet also recognize the potential for diversion, abuse, misuse and injury or death from narcotic medications. As boards, we believe a clear statement of our shared expectations may promote responsible prescribing and dispensing in the professions we regulate. By working together we believe optimal care can be provided and drug abuse or misuse ~~prevented.~~deterred. To that end we agree to the following general principles for prescribing and dispensing narcotic medications:

1. Safeguards against abuse and misuse of prescription narcotics include a **thorough evaluation** of the patient's condition, needs and history as well as their risks for addiction or diversion. Further safeguards in the treatment of pain include a **therapeutic relationship** with an ongoing reconciliation and alignment of functional goals.
2. Regular **access** to the Idaho Prescription Monitoring Program (**PMP**) may provide valuable information for the treating professional about the patient's behavior and needs.
3. Practitioners treating acute and chronic pain should **stay informed** of evidence-based practices to develop and maintain competence in the assessment and treatment of these common but difficult to treat conditions. This includes maintaining comfort with consultation and knowledge of the available treatments.
4. **Collaboration** with others on the **healthcare team** can improve patient treatment and function as well as aid in the necessary vigilance needed to prevent prescription narcotic misuse, abuse, diversion or harm.
5. **Patients** should receive **education** on appropriate use, storage and disposal of narcotic medication, as well as their potential for abuse, diversion and misuse. Further, patient empowerment through education and investment in functional goal setting is considered therapeutic.
